

# Save Water and Money!

## Hernando County Utilities Department Water Conservation Incentive Programs

The Low Flow Toilet Rebate Program and the Rain Sensor Rebate Program are available from **November 14, 2018 through September 27, 2019** and are available to customers of the Hernando County Utilities Department.

### Low Flow Toilet Rebate Program

Don't flush your money away! If you have a toilet that was installed before 1994, you could be using more water than necessary. HCUD is offering **up to a \$200.00 (\$100.00 per toilet) water bill credit** for customers who are qualified and participate in our toilet replacement program. This program gives a water bill credit for qualified customers who have their high-gallon per flush toilet replaced with a new water-saving toilet of **1.6 gpf** (gallon per flush) or lower (**1.28 gpf**) between **11/16/18 and 9/27/19**.

\* If your home was built in 2000 or before, you may replace a 1.6 gpf toilet with a 1.28 gpf toilet. Once an account holder reaches their maximum of two different toilets and \$200, no other toilet replacements on that account qualify for a water bill credit. (i.e., If you replaced a 3.5 gpf toilet with a 1.6 gpf toilet, and received a water bill credit in the past, you do not qualify if you replace that 1.6 gpf toilet with a 1.28 gpf toilet.)

#### How do I qualify for this rebate?

\*You must be a customer of the Hernando County Utilities Department.

\*If you have a home built before 1994 and you have a 3.5 gpf (gallons per flush) or higher water-using toilet, it must be replaced with a 1.6 gpf toilet or lower.

\*If you have a home built before 2000, you may replace a 1.6 gpf toilet with a 1.28 gpf toilet. \*See guidelines above.

\*You must use one of the participating plumbers for **purchase and installation** of your new toilet(s).

\*DIY Installations do not qualify for this rebate program.

# Save Water and Money!

## Hernando County Utilities Department

### Water Conservation Incentive Programs

It is time for the Hernando County Utilities Department 2019 Water Conservation Incentive Programs! These rebate programs are available from **November 15, 2018 through September 27, 2019** and are available to customers of the **Hernando County Utilities Department**.

## Rain Sensor Rebate Program

Give your irrigation system a break! A properly working rain sensor automatically shuts off your sprinkler system when there has been adequate rainfall. It helps save money and conserves water!

HCUD is offering a **\$50.00 water bill credit** to customers who purchase a new rain sensor between **11/16/18 and 9/27/19**.

### How do I qualify for this rebate?

- \*You must be using water provided by HCUD to irrigate your yard.
- \*Your home and irrigation system must be older than 2005.
- \*You must purchase a new rain sensor within the time limits of the rebate, from one of our participating irrigation companies.
- \*You must use one of the participating irrigation companies for **purchase and installation** of your new rain sensor.
- \*DIY installations do not qualify for this rebate program.
