

Mechanical whole plant removal

Peppertree control

- Cut stump
 - Triclopyr amine (3 lb ae/gal)
 - Garlon3A, Renovate and generics @ 50% v/v
 - Glyphosate (4 lb ae/gal)
 - Roundup Pro, Rodeo and many generics (50-100% v/v)
 - Triclopyr ester (4 lb ae/gal)
 - Garlon 4 Ultra and generics (10-20% v/v)
 - Pathfinder II @ 100% v/v (undiluted)

Treat the entire surface of small stumps

No need to do this for water soluble herbicide treatments...

Cut Stump

Oil based mixture (basal bark mix)

- When spray crew follows cutting crew days or weeks later
- Spray top of stump to the point of run-off and to exposed bark around the sides to the groundline.

Peppertree control

- Basal bark
 - Triclopyr ester (4 lb ae/gal)
 - Garlon 4 Ultra and generics (10-20% v/v)
 - Pathfinder II @ 100% v/v (undiluted)

Basal bark treatment

Treat the lower
12-15 inches
of every stem!

Peppertree control

- Foliar treatment
 - Triclopyr ester (Garlon 4 Ultra and generics)
 - Triclopyr amine (Garlon 3A, Renovate and Generics)
 - Glyphosate (Roundup Pro, Rodeo, and generics)
 - Imazapyr (Habitat, Arsenal)

UGA5162013

Peppertree control

- Hack and squirt/injection
 - Multi-stemmed trunks currently make hack and squirt very difficult
