

10/31/2017

Attn: DOEA and Hernando County Emergency Management

Petition to Extend Time frame for completion of generator installation:

Crown Pointe of Spring Hill-ALF # 9757

Sandy Renaud, Executive Director

11291 County Line Rd

Spring Hill, Florida 34609

scroson@cpcommunities.com

352-799-1422

Rule: 58AER17-1

Emergency generator installation to maintain ambient temperature at or below 80 degrees Fahrenheit 96 hours after loss of power.

Attachment: Exhibit A, titled Gaudette Electric.

An Olympian 60 kw 208v 3 phase natural gas generator was delivered to Crown Pointe of Spring Hill on 9-27-2017.

A contract was completed on 10-03-2017 for installation of 10x10 concrete pad- 12 inches depth with 5000 PSI commercial grade concrete with commercial fiber mesh reinforcement and completed today 10-31-2017.

No local electricians have been available or will commit to having the man power needed to connect this generator to air supply source except Guadette Electric in Homosassa Springs, Florida as per exhibit A.

Hernando County is in a continued state of recovery more especially post storm surge from Hurricane IRMA that occurred recently to flood the Withlacoochee River extending our recovery needs to focus on Brooksville, this has created more demand on our local help and less availability for non-emergent issues.

Crown Pointe of Spring Hill has been working diligently to be in compliance with Governor Rick Scotts expectations and will continue to move forward as allowed by Exhibit A.

Sincerely,
Sandy L Croson-Renaud

Spring Hill, FL 34609

To whom it may concern,

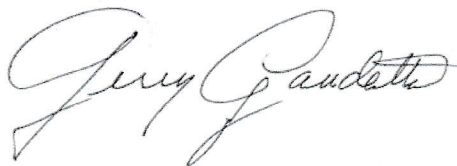

Crown Pointe of Spring Hill and Gaudette Electric, Inc. has entered into a contractual agreement to complete a build design electrical installation, including utilization of owner provided Olympian 60 kW, 208v 3-phase natural gas generator.

The intent of this installation is to provide power to an emergency panel located within the North Wing Electrical room with sufficient power for two (2) central Air-Condition Systems as well as the site lift station.

The project is currently in final design stage, prior to going to engineering permitting for final building department review and permitting.

Please feel free to give me a call or e-mail should you have any questions or concerns.

Sincerely,

Gerry Gaudette, President
Gaudette Electric, Inc.
