

# HERNANDO COUNTY EMERGENCY OPERATIONS CENTER ALERT

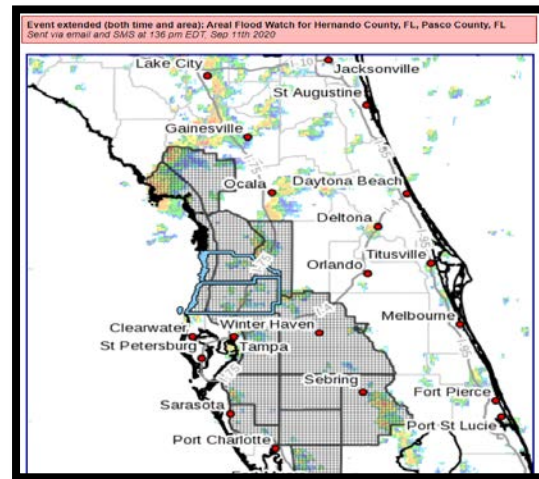

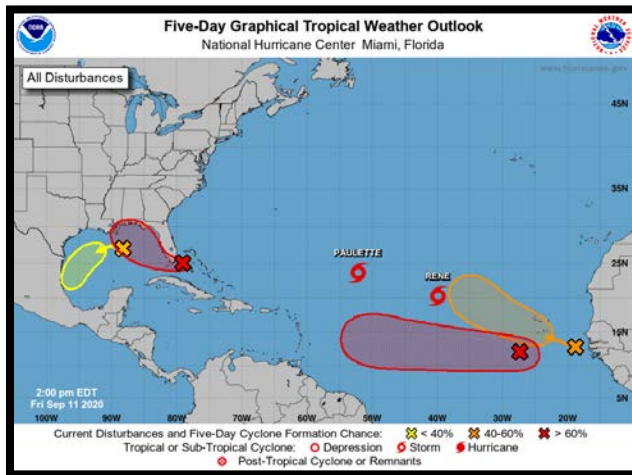

<b>EVENT</b>	<b>Invest 96L &amp; Areal Flood Watch</b>
<b>DATE</b>	11 September 2020
<b>TIME</b>	2:00 PM
<b>REPORT #</b>	1
<b>EOC LEVEL OF ACTIVATION</b>	Level 3 - MONITORING

## CURRENT SITUATION

The National Hurricane Center is monitoring the development of **Invest 96L** between the northwestern Bahamas and South Florida. The disturbance is expected to move slowly west-northwestward over the northeastern Gulf of Mexico this weekend and early next week. Regardless of development, this system is expected to produce locally heavy rainfall over portions of the Bahamas, South Florida, and the Florida Keys during the next couple of days.

Abundant tropical moisture associated with this feature will bring increasing rain chances to the area tonight and into the weekend with some very heavy rainfall possible, which may lead to flooding of low lying and poor drainage areas. As a result, the National Weather Service has issued an **Areal Flood Watch for Coastal Hernando County through Sunday evening.**

## RECOMMENDED ACTIONS

- Register for automated severe weather notifications at <http://www.AlertHernando.org>
- Take this opportunity to refresh your emergency supply kit. For more information, visit <http://www.HernandoCounty.us/EM>
- Residents are encouraged to monitor local media outlets or the National Weather Service at <https://www.weather.gov/tbw/> for current weather information.
- Test your weather radio today and change the battery if needed.
